How we Adapted to Change

Bridging Generations

Tips from a 'semi old' colleague

- Have fun and a good laugh with your colleagues on a regular base
- Share experiences and trust that the new generations will also work it out, like you did
- Invest in yourself
- Stay open minded, keep talking and listen to each other
- Be there where the decisions are made
- Put effort in everything you do and work together!

If you have the right attitude and work culture, any plan and strategy will be successful
